Subject: RE: Upper Animas Spring Sampling

Hi Again

We have decided to postpone next week's sampling for a variety of reasons including mostly flow this will allow us to clean up our SAP and finish requesting access. We are rescheduling the week of June 8 which "should" afford us access to upper stations when they are flowing and still be on the high side of the hydrograph at our lower stations.

If you are able and would still like to participate with us on June 8th, please let me know as soon as possible.

I sincerely apologize for the inconvenience.
